

CS-103: Introduction to Internet Technologies and Web Programming  
 Homework 5  
 Due on paper at beginning of class Wed Oct 11, 2006

Read Web 101 Ch 6  
 See class notes at <http://cs103.pbwiki.com>

Homework collaboration policy: You must write answers in your own words and do computer exercises on with your own hands at your preferred Internet connection. **You may collaborate provided that you write the full names of your collaborators on your submitted homework.**

Log in to the Google Analytics account you created in Lab 4. Print a screen shot of the executive summary. It will probably look something like this:

Write a post on your blog that mentions how much traffic your blog is getting. Your post must include a table with three columns, two rows, and visible borders. The first row of your table must include titles for each column: "Date range", "Visits", and "Pageviews". The second row of your table must include data from your Google Analytics executive summary screenshot. You will find the date range near the upper right and the visits and pageviews near the upper middle of the screen.

Print a screenshot of your blog post. It will look something like this:
