

Instructions for Google Colaboratory

1. Open your browser, log into Piazza and access **Resources** on the CS237 Piazza page. You can also click on <https://piazza.com/bu/spring2023/cascs237/resources> or copy and paste the link.
2. Look for a section named **Homework** to download your programming assignment, as shown in the image bellow. All programming assignments have the file extension `.ipynb`, also known as Python Notebook. Click on the name of the Python Notebook and save it in your computer.

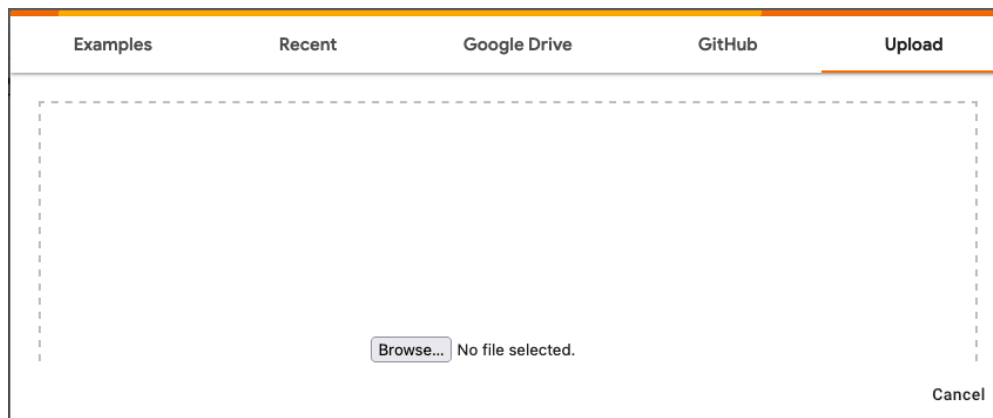

Homework ⓘ Manually sort using ≡

Homework	Due Date
CS237_Fall_2023_Programming_Assignment_01.ipynb ≡	Jan 26, 2023

3. You will use Google Colaboratory to help you to write our code in your Python Notebook. Log into <https://colab.research.google.com/>, click on **File**→**Upload notebook**.

4. To upload your Python Notebook, you can simply *drag-and-drop* it into the uploading area or Browse through your files. Once you upload the Python Notebook, your screen should refresh and you would be ready to start solving your programming assignment.

5. Read the instruction in the Python Notebook carefully. Pay attention to the due date **every Thursday** so you don't miss your deadline. Write all your code in this file, be sure to click on **Runtime**→**Run all** and verify that everything works as you intended.

6. Now you can access Gradescope (<https://www.gradescope.com/>) and upload your Python Notebook for grading.
